Precision Farming 3.0: Free Pack for Farming Simulator 25 Adds Realism in May

- Precision Farming 3.0 includes six machines & new features
- Adding tramlines, pulse width modulation, section control & more
- Released for free on May 8th by GIANTS Software
- Previous versions have been downloaded over 5 million times

Farming Simulator 25 gets a substantial boost in realism with new features and in-depth gameplay mechanics. With Precision Farming 3.0, the continuation of an initially EU-financed project to promote sustainable farming technology, publisher and developer GIANTS Software adds features and machines.

Tramlines & Subsidies

Tramlines help farmers guide machinery along predetermined tracks on the ground for more precise field management and crop growth. When planting catch crops like oilseed radish, Precision Farming 3.0 rewards virtual farmers with subsidies to make nitrogen-saving planting more attractive than conventional fertilizing – just like in real farming.

Pulse Width Modulation & Section Control

With environmental impact in mind, Precision Farming 3.0 now offers more advanced machine-level features. Farmers can fine-tune sprayer settings using Pulse Width Modulation (PWM), which adjusts fertilizer output for smoother application, greater efficiency, and reduced environmental impact.

PWM sends rapid bursts of fluid through nozzles instead of a continuous stream. Each nozzle works independently, allowing variable rate control of flow across the sprayer's width based on driving speed and turns. This ensures that fertilizer is distributed evenly and efficiently. In addition, Automatic Section Control activates or deactivates individual implement sections at set field locations, ensuring fertilizer or crop protection is applied only where needed.

More Machines & Retro-Fit Sensors

Six machines are featured in Precision Farming 3.0. New additions include the John Deere R975i trailed field sprayer and the HAWE body swap system, which lets you use trailer bodies like the Wienhoff 25.200 PTW Profi Line slurry tanker. Additionally, existing sprayers can be retrofitted with Trimble WeedSeeker2 sensors for smart spot spraying of weeds.

Precision Farming 3.0 also includes all the features of previous versions: Soil Types, Soil Sampling, Environmental Assessment, Economic Analysis & Yield Maps, Crop Sensors & Variable Rate Applications. The free smart farming add-on for Farming Simulator 19 and Farming Simulator 22 has been downloaded more than 5 million times, GIANTS Software is committed to continuing and expanding it due to popular demand.

Farming Simulator 25 is available for PC, Mac, PlayStation®5 and Xbox Series X|S. Precision Farming 3.0 will be released as a free DLC via the official ModHub on 8th May. A Year 1 Season Pass is obtainable, which includes three packs and a major expansion – fans save up to 25% compared to getting the content separately. GIANTS Software will continue to release free content updates and user-generated content, too. Visit the official Farming Simulator website and the GIANTS Software press area for more information.

About GIANTS Software

GIANTS Software is an international game developer and publisher from Switzerland, established in 2004 and known worldwide for creating the popular Farming Simulator franchise. Self-sufficient with offices in Switzerland (Zurich), Germany (Erlangen), USA (Chicago) and the Czech Republic (Brno), the team is committed to position itself as a leading publisher in the simulation genre, with Project Motor Racing to be introduced to the racing scene soon. The company maintains a global network of partners and close ties with respective industries. Visit giants-software.com for more information.

About Farming Simulator

With more than 40 million copies of the main series sold worldwide since 2008, the Farming Simulator franchise is leading in its genre. Available on all major platforms, the games feature hundreds of authentic machines from renowned brands and offer compelling agricultural simulation with relaxing, family-friendly gameplay. It's based on the powerful GIANTS Engine – built in-house to provide realistic physics, high-fidelity graphics, dynamic systems and extensive modding support. Visit farming-simulator.com for more information.
